Issue No. 1/1991

Master Layout Plans

Conditions of Sale for large scale developments usually contain a requirement for the submission of Master Layout/Concept Plans. The purposes and objectives of a Master Layout/Concept Plan are :-

- (i) to ensure that the nature and layout of a particular large-scale development are acceptable to Government;
- (ii) to ensure that the whole site is developed in an orderly and composite manner; and
- (iii) to enable the developer to submit his proposals and receive an early indication that the general nature of the development and the proposed layout thereof are acceptable.

2. Master Layout/Concept Plans are called a variety of names, e.g. Master Plan, Layout Plan, Preliminary Concept Plan, Layout and Master Plan, General Layout Plan, but the objectives are the same. To eliminate possible confusion such plans will all be called Master Layout Plans in future Conditions of Sale.

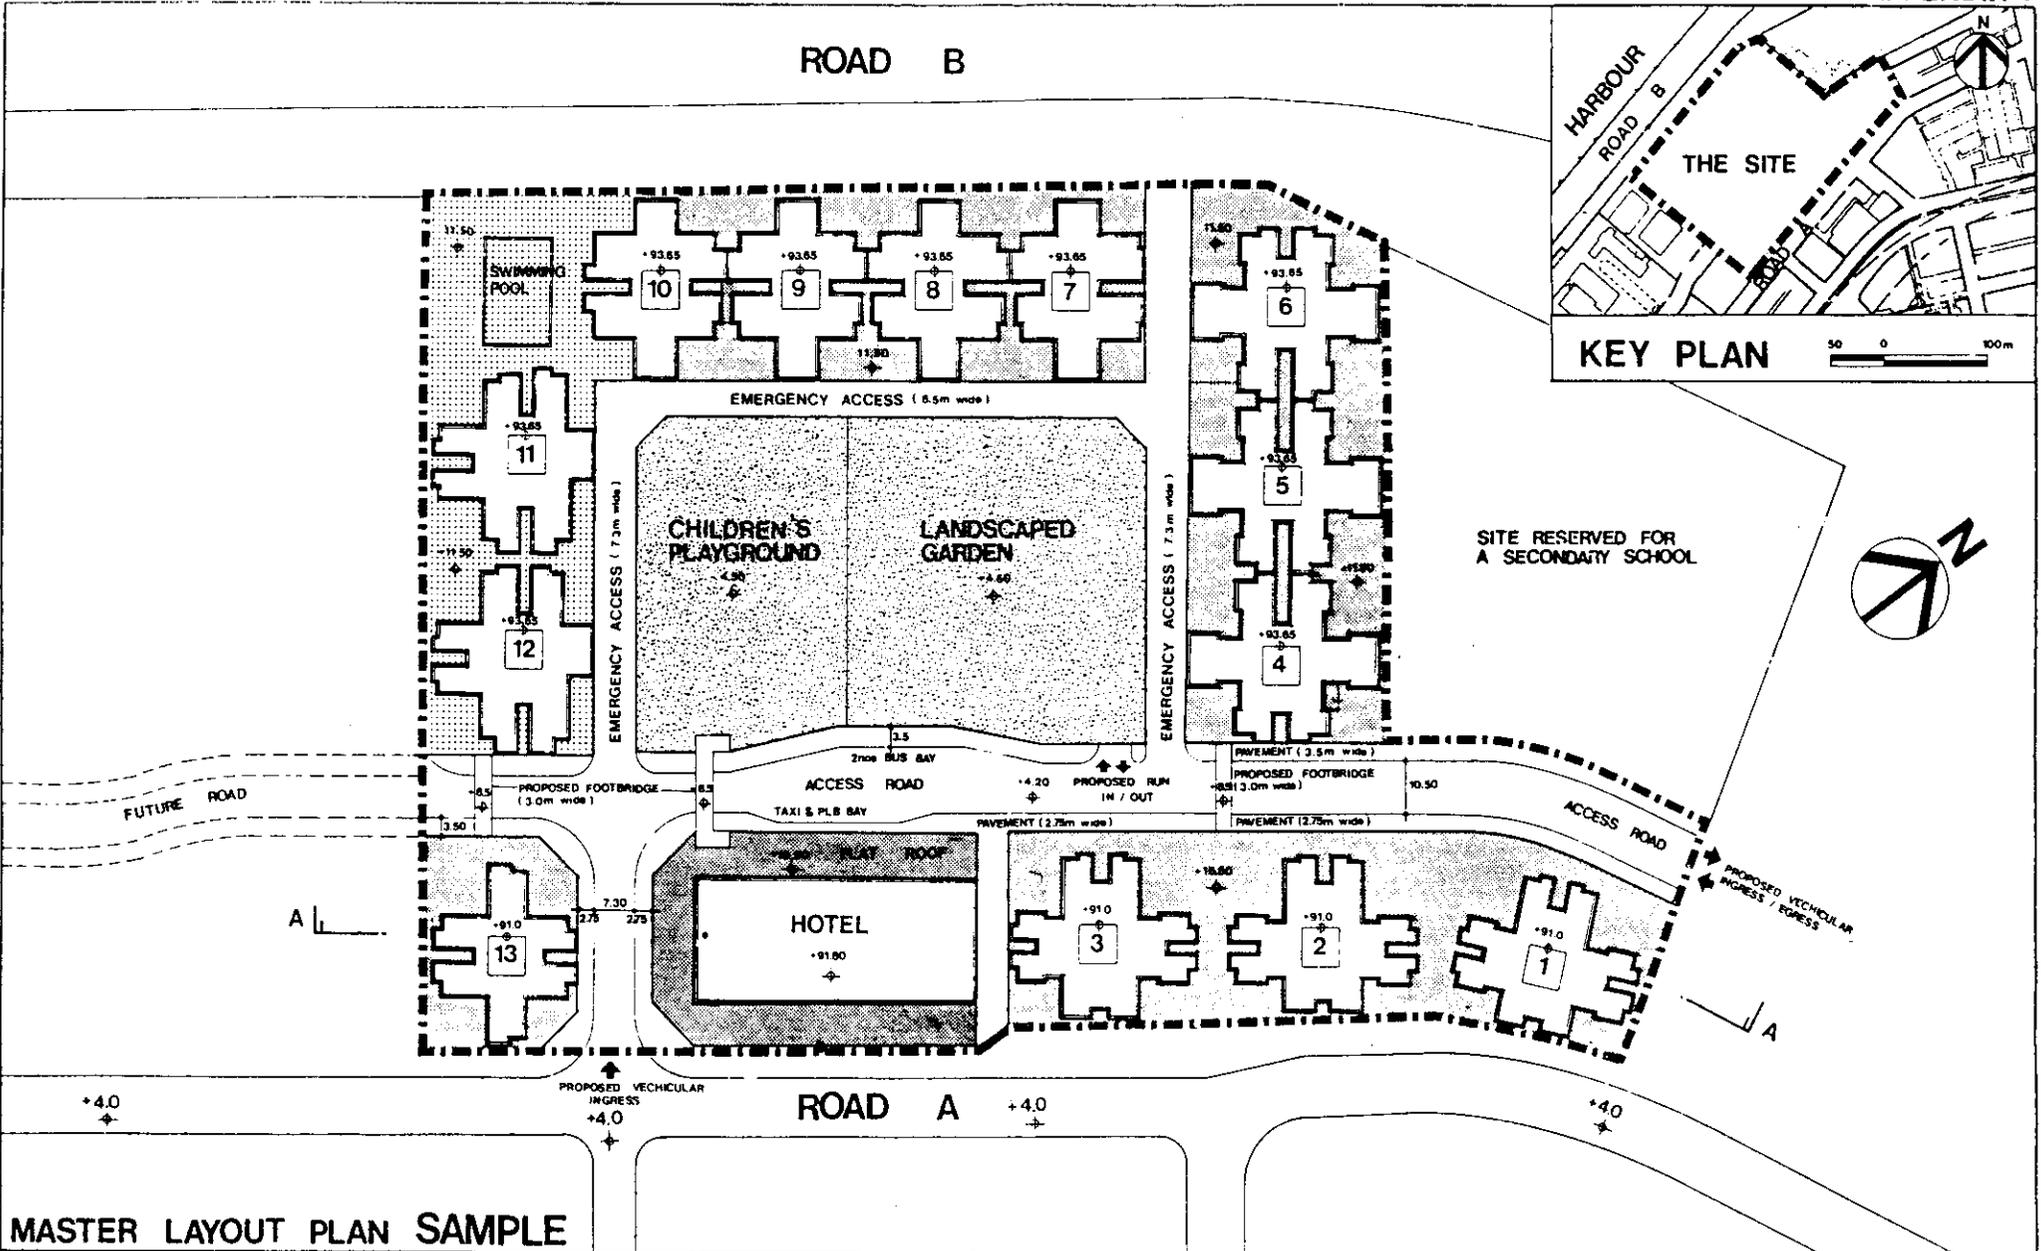

3. To achieve the objectives of a Master Layout Plan sufficient information should be provided either in the form of plans, sketches or written statements. Information to be included in a Maser Layout Plan will be specified in the Conditions of Sale and will usually include the following :-

- (i) the formation levels of the site and the position, widths and levels of any proposed roads, emergency accesses, footbridges and pedestrian ways;
- (ii) the nature, height and gross floor area of the buildings proposed including their disposition, location and distribution;
- (iii) the vehicular ingress and egress arrangements;
- (iv) an indication of the locations for the parking of vehicles;
- (v) any communal open space and an indication of landscaping and recreational facilities proposed; and
- (vi) the stages or phases of the development.

- 4. To illustrate the information to be provided in Master Layout Plans a sample Master Layout Plan is attached at [Appendix I](#).

*(A. G. Eason)
Director of Buildings and Lands
