Note

- (1) Thickness of NSPEWall is shown on the approved building plans. If more than one thickness are mentioned, majority principle applies.
(2) In accordance with the "February 2006" version of Joint Practice Note No. 2, thickness of NSPEWall in excess of 300 mm should be accountable for GFA calculation.
(3) The district boundary follows that of Appendix VII to LAO PN No. 3/2024. For lots straddling over two districts, the higher rate is applicable.

-Cladding (non-load bearing/non-structural) in the form of mosaic tiles or similar tile cladding as an external wall finish which only beautifies the appearance of the building should not be accountable for premium calculation. Other claddings such as claddings in the form of curtain wall design and attached to the external structural walls should be GFA countable but can be exempted subject to lease modification and payment of premium to be assessed.

-The above standard rate applies to the exempted area for NSPEWall as calculated and shown on the building plans approved by BA in accordance with the "February 2006" version of Joint Practice Note No. 2.

-Average flat size at Note (3) above means average flat size of the whole development (i.e. total residential GFA/total residential unit).
